WEEK 2

HTML SCRIPTING

UDICTI UPSKILLING

HTML

HTML

HTML

- Hyper Text Markup Language
- Standard ML for creating Web Pages
- Defines the structure of Web page
- Think of it as a **Skeleton** of Websites

How it works

HTML

Elements for Content Scripting:

Structural, List, Semantic, Media, Table, Text,
Form, Interactive.

Browser Support

reads(interprets) and renders the HTML
elements to Display the Content

fundamentals

Structural

<html> | <head> | <body>

Lists

 | |

Media

 | <audio> | <video>

Table

<table> | <th> | <tr> | <td>

Text

<h1> to <h6> | <p> | | <a>

Semantics

<header> | <nav> | <section> |
<article> | <footer> | <div>

Forms

<form> | <input> | <button> |
<label>

Hands on Practical

Script a Simple Portfolio Website

[TOOLBOX](#)

Hi! I'm Lauren Hom.

I'm a designer & lettering artist with a knack for marketing who loves helping creatives and brands get more eyes on their work.

I'm also training to become a chef.
(Yeah, I've got a lot of passions.)
